Standish-Sterling Community Schools Expands Fast ForWord Program

Standish-Sterling Community Schools has decided to expand their Fast ForWord lab to provide the brain-based software to more students. The Fast ForWord family of products provided by Job Skill Technology, Inc. (JST) has been utilized in the district for the past three years and has greatly improved student achievement and reading scores. This continuous improvement was paramount in the expansion of the program. This expansion will double the size of the existing Fast ForWord lab and provide the opportunity for additional students to benefit from the program.

Job Skill Technology, Inc. is a leading solution provider of computer-based learning and educational tools for pre-kindergarten through adult learners.
