Battle Creek Selects Plato and JST for Web-based Computer Learning

Job Skill Technology, Inc. (JST, Inc.) is proud to announce that Battle Creek School District has selected JST, Inc. and PLATO Learning to provide on-line curriculum to students. The web-based program will support students throughout the district, including those in alternative settings and traditional K-12 buildings. PLATO will allow teachers to individualize instruction so that staff and students are able to effectively teach and learn. Studies have shown that many students respond well to computer-based instruction as they build academic skills and earn credits. Battle Creek has access to a comprehensive selection of curriculum, ranging from grades K-12 with age-appropriate content to help meet the needs of all students. JST, Inc. is the Michigan-based dealer for PLATO Learning and will provide local support for the program. PLATO users in the district have identified several features of the program that will help to ensure success. The K-12 range of content, age-appropriate graphics, audio support and flexibility of the management system all have been identified as improvements over other computer-based programs.

Job Skill Technology, Inc. is a leading solution provider of computer-based learning and educational tools for pre-kindergarten through adult learners. The company specializes in software, assessment and accountability solutions, e-learning, and hardware with special emphasis on technical support and training.

The company serves K-12 schools, alternative and adult education, state and local government, colleges and universities, correctional institutions, job training programs, corporations, and private industry.

Job Skill Technology, Inc. is headquartered at 1000 N. Opdyke Road, Suite D-2, Auburn Hills, Michigan 48326, 800-783-5780.
